

Universal Stand

RF receiver and remote display support

Description

The Universal Stand has been designed to support cabled remotes and RF receiver from the Interspace Industries brand. This will stop the RF Receiver just being laid down on top of the system thereby ensuring the aerial is in a more efficient position.

Using the Universal Stand for the RF Receiver is the next best thing to hanging it back stage near to the presenter and orientating the aerial in the correct plane (pointing up).

For Confidence Lamp, Indicator Lamp and Intelligent Lamp, the Universal Stand will enable these remotes to be displayed on a desk.

The Universal stand has either male XLR for the RF receiver, Intelligent Lamp and Indicator Lamp or female XLR for the Confidence Lamp.

Features

- Simple tool
- Easy set up
- Fully assembled
- 1.5m fixed lead

3 year Limited Factory Warranty
